

Nano Wavebox 6206

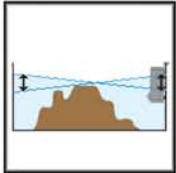

You really dive...

Today, „Wavebox effect“ is frequently used in aquarism to describe an oscillating current. „Wavebox effect“ describes the image of slowly and regularly rocking polyps in an aquarium like at the beach zone of an ocean. Thanks to Nano Wavebox 6207, the „Wavebox effect“ can now also be applied to smaller aquariums from 150 to 600 litres (39 to 158 USgal.). This wave generator with its well-thought-out design and innovative technical solutions adapts itself to the aquarium without affecting the existing biotope.

In 2004, TUNZE® marketed the „Wavebox“ as a world novelty - a patented wave generator for aquariums of 200 to 1,200 litres (52 to 317 USgal.). The current corresponds exactly to the wave structure and water movement in reef top zones. The Wavebox applies this oscillating principle through Wave Controller 6091, which uses the intrinsic resonance of the tank. The Nano Wavebox uses the same principle, but has been designed for smaller aquariums from 150 to 600 litres (39 to 158 USgal.). The very compact dimensions permit discreet attachment in small or medium-sized aquariums. The integrated Magnet Holder permits an uncomplicated attachment at every point of the aquarium with a glass thickness of 19 mm (.74 in.).

It supplements existing circulation pumps. Power consumption in one cycle from 2 W to 18 W; about 10 W on average. Delivery condition: Ready to fit with Nano Magnet Holder for attachment to vertical panes or an aquarium with glass tops, Wave Controller and photo-electric cell.

Oscillating current with near-nature wave movement and circulation.

Wave generation at low power consumption, high efficiency and low motor heat.

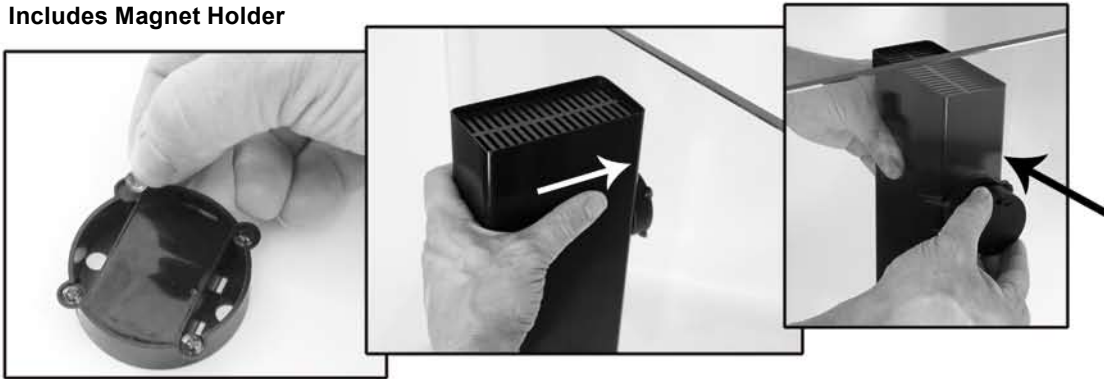

De-sedimentation of the entire aquarium habitat.

Safety extra-low voltage, blocking and run-dry protection, alert sound emitter.

Includes Magnet Holder

Nano Wavebox

Dimensions: L 125 x W 55 x H 220 mm (L 4.9 x W 2.1 x H 8.6 in.). Immersion depth: approx. 180 mm (7.0 in.), on average 10 W, 230 V / 50 - 60 Hz (115 V / 50 - 60 Hz).

For tanks from 150 to 600 litres (39 to 158 USgal.).
